

# Enhancing Digital Transformation Initiatives

## Challenge:

How can a global enterprise manage and secure IT assets, maintain CMDB accuracy, and align IT services with business goals?

## Solution

Integrate **Tanium's** endpoint security and management with the robust **ServiceNow** platform, **amplified by Plat4mation's expertise**, for efficient operations, improved security, and superior IT service delivery

**servicenow**

PLAT4MATION

**TANIUM**

## CMDB Excellence

Use Tanium for **real-time** endpoint monitoring and IT asset discovery. Populate and refine the ServiceNow CMDB with this data, leveraging Plat4mation's **self-healing CMDB** strategies to auto-correct inaccuracies and remove duplicates for data integrity

## IT Asset Management

Utilize Tanium for detailed asset discovery and management, integrating with ServiceNow's ITAM and using Plat4mation's methods to **streamline the asset lifecycle** from procurement to disposal, ensuring compliance and optimizing licensing and usage

## Cybersecurity Fortification

Harness Tanium for threat detection and **compliance**, integrating with ServiceNow's Security Operations for **automated workflows**. Plat4mation's framework ensures the **CMDB** **reliably** supports incident analysis and prioritization

## Strategic ITSM

Deploy ServiceNow's ITSM suite with Tanium's insights for smarter decisions, streamlined by Plat4mation's optimization, ensuring **ITSM alignment with business goals** and improved IT-business communication

## Security & Compliance Benefits

Elevate your security measures and compliance standards across the enterprise. Real-time monitoring and automated remediation of security threats reduce vulnerabilities, ensuring adherence to regulatory requirements and safeguarding against data breaches

## Positioning for the Future

Enables quick adaptation to technological advancements and market shifts, ensuring the IT infrastructure is resilient, scalable, and ready to support new business models and digital initiatives

## Quantifiable Impact

- Reduced operational costs through automated asset management
- Decreased downtime via efficient incident handling
- Enhanced employee productivity

These impacts contribute to a stronger bottom line and a competitive edge in the digital era
